

CONTENTS

INTRODUCTION.....	5
Survey of Literature Data Concerning Distribution and Quantitative Presentation of Mayflies and Stoneflies in the Investigated Area	9
MATERIAL AND METHODS.....	17
Material	17
Methods Used.....	19
Selection of Localities Studied.....	19
Methods of Sampling and Study of Environmental Factors	25
Methods of Evaluation of Qualitative and Quantitative Changes in Distribution of Mayflies and Stoneflies.....	28
RESULTS.....	36
Qualitative Analysis of Occurrence of Individual Species in the Labe, Odra and Morava River Basins.....	36
Species Composition of Fauna of Mayflies and Stoneflies	36
The Ephemeroptera.....	36
The Plecoptera	41
Chorological Analysis of Individual Species.....	47
The Ephemeroptera.....	47
The Plecoptera	48
Species Composition of Investigated Localities and Faunal Exchange.....	50
The Labe River Basin	50
The Odra River Basin	66
The Morava River Basin.....	69
Distribution, Abundance and Life Cycles of Species Found at Selected Localities	76
The Ephemeroptera.....	76
The Plecoptera	106
Characteristics of Individual Species from the Biodiversity Protection Point of View.....	136
The Ephemeroptera.....	136
The Plecoptera	138

Statistical Evaluation of Biodiversity of Mayflies and Stoneflies Found at Selected Localities of the Labe, Odra and Morava River Basins	142
Biodiversity of Mayflies and Stoneflies in the Investigated Area:	
Q Coefficient	142
Multicriterial Analysis.....	156
Hierarchic Divisive Classification of Localities	156
Detrended Correspondence Analysis: Ordination of Species and Localities	162
Prediction of Changes of Investigated Localities	167
DISCUSSION AND CONCLUSIONS	177
Characteristics Features and Origin of Mayfly and Stonefly Fauna in the Investigated Area.....	177
Specific Factors Affecting Distribution of Mayflies and Stoneflies	177
Historical Factors Forming Mayfly and Stonefly Fauna in the Investigated Area.....	178
Origin and Chorological Specificity of Central European Mayflies and Stoneflies	181
Recent Area Changes and Main Factors Affecting Distribution of Mayflies and Stoneflies in the Investigated Area	185
Main Factors Limiting Distribution of Mayflies and Stoneflies in the Investigated Area.....	189
Statistical Methods to Evaluate Changes of Biodiversity and their Efficiency	195
Evaluation According to Q Coefficients.....	195
Hierarchic Divisive Classification (TWINSpan).....	200
Detrended Correspondence Analysis (DCA).....	204
Prediction of Changes and Future Prospects	207
