

Table of contents

Preface	XXV
Organisation	XXVII
Volume 1	
Section 1: Underground city design, planning of underground constructions	
Largest transportation system – Metro and road in the same tunnel <i>V.M. Abramson & S.Yu. Loubotski</i>	3
Anchor recovery under extreme conditions in downtown Leipzig, Germany <i>L. Babendererde & P. Elsner</i>	7
Construction of Metro IVC2 Ládví – Letňany in Prague <i>V. Bartoň, M. Kochánek, V. Valeš & J. Kutil</i>	13
Planning for Canada's first bored road tunnel in over 40 years Kicking Horse Canyon Project <i>D. Brox, S. Bean, P. Branco & T. Coulter</i>	19
Preparation of Metro's A line extension in Prague <i>V. Cigánek & J. Růžička</i>	27
Preparation of Metro's new D line in Prague <i>V. Cigánek & J. Růžička</i>	33
The Turecký Vrch railway tunnel <i>M. Dávid, J. Mára & J. Korejčík</i>	39
Collectors – System approach to the regeneration of technical infrastructure in the city of Prague <i>F. Dvořák & M. Hradecký</i>	45
Years of planning and implementation: Two major urban tunneling projects in Los Angeles, California, USA <i>M.A. Elioff, B.W. Miya & J.H. Albino</i>	51
Geological and geotechnical conditions in underground structures design of Rome subway: The B-Line extension <i>R. Enrione, A. Eusebio, L. Soldo, R. Funicello & L. Solimene</i>	59
Ontologies, thesauruses and information systems for tunnels <i>N. Faure</i>	65
Building the underground infrastructure of Lausanne's new m2 metro line <i>F. Gaj & M. Badoux</i>	69

Metro Santiago – Building an urban tunneling industry from the ground up <i>A.R.A. Gomes, M. Böfer & P. Muñoz</i>	75
The slivenec tunnel on the Prague city ring road <i>O. Hasik & K. Závora</i>	81
Portals – The architecture visible in cities and landscape <i>O. Hasik & P. Šourek</i>	87
Study of the ship lift structure at the Słapy Dam <i>M. Jakoubek, J. Kuňák & P. Uher</i>	91
Design of the District Heating Tunnel in Copenhagen <i>T. Kasper, C. Edvardsen & M. Faurschou</i>	97
Excavation connecting the underground ventilation station and the underground expressway tunnels <i>Y. Konishi, I. Kamegaya, A. Ueda & Y. Imanaka</i>	103
Prague – Beroun, new railway connection <i>D. Krása, J. Růžička & O. Hasik</i>	111
Underground high-speed railway – The phenomenon of urbanistic development in Prague <i>E. Kyllar</i>	117
Railway line Prague centre – Ruzyně airport <i>J. Martinec & P. Zobal</i>	125
The Trans Hudson Express (THE) Tunnel <i>N. Munfah & A.D. Silber</i>	131
CTA Block 37 Tunnel Connection in downtown Chicago <i>V. Nasri & P. Razgha</i>	137
Construction of a large underground station under a station in operation <i>T. Niibori, Y. Seki, T. Sato, T. Yamada & T. Fujiwara</i>	143
The next step: The Very Long Tunnel (VLT) <i>H. Ostlid, W.C. Grantz, J. Saveur & B. Jakobsen</i>	149
Planning and construction of major infrastructure works in Croatia <i>J. Radic, P. Djukan & Z. Zderic</i>	155
The Dulles Corridor Metrorail Project – Tunneling aspects of the Metrorail extension to Washington, DC Dulles International Airport Phase I and Phase II <i>J. Rudolf, V. Gall & K. Zeidler</i>	161
Experience from architectural design and Build of the underground space <i>P. Šafránek</i>	167
Study on underground space planning of Shanghai EXPO 2010 <i>H.H. Zhu, P. Li, X. Wang, F.L. Peng & Y.S. Li</i>	173
Section 2: Geotechnical survey and improvement of ground mass	
Part 2.1 Geotechnical survey	
The impact of puncturing support on the expansion of seismic effects during blasting activities in tunnels <i>H. Antičević, Z. Ester & M. Dobrilović</i>	179

Two different concepts of geotechnical survey and monitoring in exploration galleries for tunnels in Prague – Lahovská exploration gallery and Blanka exploration gallery <i>R. Chmelař & B. Březina</i>	191
Inverse analysis on measurements realized during a tunnel excavation <i>S. Eclaircy-Caudron, D. Dias & R. Kastner</i>	197
Prediction of the ground conditions ahead the TBM face in the tunnels of Guadarrama (Spain), using geophysical methods and in situ testing <i>J.M. Galera, S. Pescador, A. Rodriguez & M. Torres</i>	203
Risk analysis of soil transition in tunnel works <i>Q.F. Hu & H.W. Huang</i>	209
Feasible Boulder treatment methods for soft ground shielded TBM <i>W.W. Jee & S.-G. Ha</i>	217
Reasons of swelling of miocene clays near Třebovice in Bohemia <i>F. Kresta</i>	223
Geophysics method used to recognize the boundary between different deposits <i>R. Kuszyk & M. Superczyńska</i>	227
Geotechnical exploration for the Dobrovského Tunnel in Brno <i>J. Pavlík, D. Rupp & L. Klímek</i>	231
Design and construction of a large underground cavern in Atlanta, Georgia, USA <i>T.W. Pennington, R.F. Cook, D.P. Richards & G. Barnes</i>	237
Development of in-situ tunnel-ahead detection system using electromagnetic wave <i>H.H. Ryu, G.C. Cho, Y.J. Sim, G.H. Lee & J.K. Lee</i>	243
A modified design of a large section tunnel as an auxiliary spillway along large faults <i>Y.W. Shin, I.K. Lee, T.S. Park, H.S. Choi, S.C. Park, J.K. Kim, M.S. Lee, K.H. Shin & B.H. Han</i>	249
Geotechnical control during the excavation of the tunnel of Guadarrama <i>I. Tardáguila, B. Celada, J.M. Galera</i>	255
Assessment of rock mass properties using machine performance data from roadheaders <i>K. Tsukamoto, H. Hamada & S. Ebisu</i>	261
Deep tunnelling in hardrock with large diameter TBM: What's up? An experience from the Gotthard Base Tunnel <i>I. Vicenzi, S. Pedrazzini, A. Ferrari, G. Gubler & O. Böckli</i>	267
Laboratory tests for EPB tunnelling soil conditioning <i>R. Vinai, D. Peila, C. Oggeri & S. Pelizza</i>	273
3D geo-modeling for spillway tunnel construction in the complex fault region <i>W.S. Yoon, U. Jeong, B.H. Han, K.H. Shin, S.S. Lee & Y.K. Kim</i>	279
Dilatometer tests in deep boreholes in investigation for Brenner base tunnel <i>M. Zalesky, Ch. Bühler, U. Burger & M. John</i>	283
Part 2.2 Improvement of ground mass	
The dimensioning of tunnel face reinforcement <i>G. Anagnostou & K. Serafeimidis</i>	289

Cost-effective pre-injection with rapid hardening microcement and colloidal silica for water ingress reduction and stabilisation of adverse conditions in a headrace tunnel	297
<i>A.K. Bahadur, K.G. Holter & A. Pengelly</i>	
Experimental investigation on backfill grouting deformation characteristics of shield tunnel in sand	303
<i>Y.-w. Han, W. Zhu, X.-c. Zhong & R. Jia</i>	
Advances in synthetic injection technology, do they improve tunnel construction productivity?	307
<i>W. Kay, T. Yang</i>	
Injection techniques used at the old workings and karst voids abandonment under the built-up residential areas in the Urals	311
<i>A.B. Kondratov</i>	
Instabilities at the Messochora tunnel, Greece: Ground improvement and safety evaluation based on observational data	315
<i>V. Kontogianni & Y. Thanopoulos</i>	
Rock bolt integrity evaluation in tunnelling using ultrasonic NDT techniques	321
<i>J.S. Lee, H.J. Kim, I.M. Lee, S.I. Han & Y.J. Lee</i>	
Jet-grouting in underground construction	327
<i>A.G. Malinin & P.A. Malinin</i>	
Modelling of ground freezing in tunnelling	331
<i>E. Pimentel, A. Sres & G. Anagnostou</i>	
Performance evaluation of ground improvement by electrical resistivity tomography	337
<i>T. Shimizu, K. Narumoto & S. Ebisu</i>	
Reinforcing Effects around tunnel face by crown & face reinforced	345
<i>J.H. Shin, S.H. Choi & S.B. Woo & Y.K. Choi</i>	
Laboratory testing of chemical grouting effects in rocks	353
<i>K. Souček, L. Staš, R. Šňupárek & I. Kroutilová</i>	
Section 3: Research, development and design of underground constructions in built-up areas	
Deformation computation based on numerical modelling for urban NATM tunnelling	359
<i>M.Z.A. Elrehim</i>	
Numerical analysis of TBM road tunnels under Suez Canal at Port Said	367
<i>A. Abu-Krishna</i>	
Numerical modeling of face stability for TBM tunneling	373
<i>A.A. Krishna</i>	
Impact of the face anchoring on the stability of underground working	377
<i>J. Aldorf, E. Hrubyšová & L. Duris</i>	
Bentonite and grout flow around a TBM	383
<i>A. Bezuijen</i>	
Volume changes in grout used to fill up the tail void	389
<i>A. Bezuijen & W.H. van der Zon</i>	

Laboratory tests on compensation grouting, the influence of grout bleeding <i>A. Bezuijen, M.P.M. Sanders, D. den Hamer & A.F. van Tol</i>	395
Software solutions for sensitivity studies in design of tunnels <i>E. Bieth, L. Chantron & P. Roure</i>	403
Safety problems of underground structures in the design <i>N. Bulychev, N. Fotieva & A. Levchenko</i>	409
Stability and deformations in large-scale underground constructions <i>A. Butovič</i>	415
Particular design for nuclear long term interim storage <i>N. Dias, J. Triclot, H. Lagrave & E. Breton</i>	421
Design and construction of a tunnel using the technology for controlling muck flow in the cutting chamber of an earth pressure balance shield of large cross section <i>H. Dobashi, M. Matsuda, K. Matsubara & A. Kitayama</i>	427
Estimation of front-end stability using field displacement <i>R.M. Faure, J.F. Thimus, F. Demoulin & S. Delvaux</i>	435
Influence of soil grouting on the shallow tunnel linings stress state in urban areas <i>N. Fotieva, N. Bulychev, S. Antziferov, A. Sammal & P. Deev</i>	439
Analyses of underground structures crossing an active fault in Coronado, California <i>T. Gregor, B. Garrod & D. Young</i>	445
Numerical modeling of tunnel excavation and lining under high initial stresses and high underground water pressures at Jinping Mountain <i>W. Chen & H.-N. Ruan</i>	451
Simulation of failure around a circular tunnel using a bonded particle model <i>D.S. Cheon, C. Park, S. Jeon & Y.-S. Jeong</i>	457
Deformation prediction for tunnels at PiccEx junction in London Heathrow – An engineering approach <i>J. Jäger & A. Stärk</i>	463
Improved design method for 2-arch tunnel <i>W.G. Jeon, K.-H. Jeong, J.H. Lee, H.-H. Ahn & S.-W. Lee</i>	469
Evaluation of strength parameters for the single shell tunnel in Korea <i>K.H. Joon, L.S. Ho, S.H. Seong & B.G. Jin</i>	475
Measurements and seismic effects of vibrations caused by urban tunneling <i>Z. Kaláb & J. Knejzlik</i>	481
Design method considering construction loads during shield tunneling using a three-dimensional FEM analysis model <i>K. Kasuga, N. Kawada, A. Shiratori, N. Fukai & M. Saitou</i>	487
Development of a new center-cut method: SAV-cut (Stage Advance V-cut) <i>D. Kim, S. Noh, S. Lee, B. Park & S. Jeon</i>	493
A study of the invert tunnel's behavior in a weathered-rock using laboratory model test and numerical analysis <i>K.J. Kim, S.Y. Koh, S.Y. Choo, C.S. Hong & D.J. Hwang</i>	501

Design and installation waterproofing system for access shafts of service tunnels on Palm Jumeirah Island <i>M.K. Kundu, M.E. Ryjevski & D.G. Solter</i>	507
Seismic behavior of Tubular Roof & Trench Method (T.R.&T) by numerical analysis <i>C.-w. Kwak, I.-j. Park, S.-h. Kim & J.-y. Kim</i>	513
A laboratory test for determination of the optimum installation number of face bolts <i>K.W. Seo, S.W. Lee, T. Domon & K. Nishimura</i>	519
Development of tunnel drainage system using drain board <i>G.P. Lee, H.S. Shin, G.J. Bae & S.W. Lee</i>	523
The effects of tunnelling on an adjacent single pile <i>C.J. Lee, S.H. Jun, N.J. Yoo & G.W. Kim</i>	527
Loads on the center pillar of two-arch tunnel under the influence of discontinuity planes in the ground <i>S.D. Lee, G.W. Byun, B.J. Oh & I.W. Lee</i>	533
A case study of tunnel excavation adjacent to a steep slope <i>S.-C. Lee, L.-B. Chiou & G.-F. Lin</i>	539
Subsurface settlement profiles above shallow and deep model tunnels at large ground loss <i>Y.-J. Lee & C.S. Yoo</i>	545
Application of digital image processing in tunnel excavation <i>L. Biao, Q.W.-ge, L. Yang & Wei, Hong-chun</i>	553
Recent development of tunneling techniques in Taiwan <i>H.S. Liu, P.C. Hou & C.T. Chang</i>	559
Construction method of connecting tunnel in a shield-driven tunnel <i>J. Liu, F. Zhang & H. Kong</i>	567
Closely constructing influence forecast of hydraulic tunnel under-cross existing railway tunnel <i>G. Lun, Q. Wen-ge & W. Fei</i>	571
Monitoring of the state of pipes in sewage networks as an element of adapting such networks to the technical demands of modern, urban subterranean infrastructure <i>C. Madryas & B. Przybyła</i>	577
Investigation behavior of vertical shaft under loadings of intake tower at first filling of Doosti Dam <i>D. Massoud</i>	583
Membrane waterproofing – Activation of the grouting system and its re-sealing ability <i>R. Matzner & M. Grossmann</i>	589
Geomechanical studies for a road tunnel in volcanic formations <i>A.T. Menezes, F.M. Varela, L. Ribeiro e Sousa & F. Moura</i>	595
Large-scale model tests for the verification of Braced Rib Arch Method for shallow overburden tunnel <i>S.M. Na, S.H. Moon, S.P. Lee, S.H. Cho & S.D. Lee</i>	603
An investigation into the effects of Shiraz metro tunnels on the stability of Ghadir bridge <i>I. Namazi, R. Rahmannedjad, M.A.E. Farsangi & H. Jamshidi</i>	609

Extension of the Underground Space Information Management System: Road tunnel maintenance <i>Y. Ohnishi, P.A. Bruines, T. Nakai, M. Ryu, T. Katou & K. Tsujimori</i>	613
Performance of pile due to tunneling-induced soil movements <i>C.W. Ong, C.F. Leung, K.Y. Yong & Y.K. Chow</i>	619
The continual load development measurement of the central concrete pillar in the Valík tunnels <i>J. Pacovský, J. Svoboda Jun. & R. Vašíček</i>	625
The Josef underground educational facility project <i>J. Pacovský, J. Svoboda Jun. & R. Vašíček</i>	631
Displacements estimate due twin tunnel excavation under low overburden <i>E.A. Palma Filho, A.C. Zingano, J.C. Koppe & J.F.C.L. Costa</i>	635
Parametric study of displacements on sequential and full-face tunnel excavation <i>S. Papakonstantinou & W. Schubert</i>	639
Characteristics of the ice-ring with phase change of water to ice for LNG underground storage <i>C. Park, D.S. Cheon, S.K. Chung, H.D. Lim, Y.J. Park & S.D. Lee</i>	645
Underground exploitation of a granite mine by large voids: stability aspects <i>D. Peila, S. Pelizza & C. Guardini</i>	651
Analysis of input parameters of the rock mass <i>J. Pruška</i>	661
Study on neighboring construction of three parallel shield tunnels in soft ground by centrifugal model test <i>W. Qiu, Y. Zheng, S. Li, R. Wu & H. Guo</i>	667
The effect of advance rate on shield loading in squeezing ground <i>M. Ramoni & G. Anagnostou</i>	673
Benefits and life-cycle costs of underground projects <i>J. Reilly & H. Parker</i>	679
New York Second Avenue Subway – Initial support design of shallow rock caverns <i>K. Rossler & C. Stone</i>	685
Laboratory and numerical investigation of tunnel reinforced with face bolts <i>K.W. Seo, T. Domon & K. Nishimura</i>	693
Non-linear FE analysis of a grouted pipe-roofing reinforcement applied to a tunnel portal area <i>H.S. Shin, G.J. Bae, D.G. Kim & S.W. Lee</i>	697
An enhanced pre & post processing techniques for three dimensional tunnel analysis: Tunnel Modelling Wizard <i>J.H. Shin, J.H. Moon & D.S. Shin</i>	705
Design parameter determination for modeling of pre-reinforced zones in a tunnel <i>K.I. Song, G.C. Cho, S.R. Lee & J.H. Lee</i>	713
Computer aided hierarchical ground characterization for underground structures <i>A. Steiner & W. Schubert</i>	721
Developments of structural performance assessment for sewer liners <i>C. Madryas & A. Szot</i>	727

Advanced online monitoring for urban tunneling projects <i>N. Benecke, P. Althaus & U. Kalz</i>	837
Geotechnical monitoring of the Valik tunnel construction near Pilsen <i>R. Bernard</i>	841
The use of guide lines in tunnelling <i>G. Cassani & L. Mancinelli</i>	847
Rio de Janeiro subway – Challenges of the access tunnel to the cantagalo station <i>A.A. Coutinho, M.A.L. Rocha, L.E. Sozio & W. Bilfinger</i>	851
Prediction of subsidence during tunnel construction <i>K. Grossauer, R. Leitner, W. Schubert & P. Sellner</i>	857
Monitoring of ground massif using TR-GEO georadars while drifting tunnels <i>S.V. Izyumov & I.I. Goltsman</i>	863
Application of tunnel information system for construction supported by international cooperation <i>C.Y. Kim, K.Y. Kim, Y.Z. Lee, S.W. Hong, S.H. Baek, K.W. Seo, W. Schubert & Y.S. Seo</i>	867
Influence of water back rise on tunnels and surface <i>M. Kolečkář, J. Němeček & I. Zemánek</i>	871
Geotechnical support of construction and operation of the Underground and transport tunnels <i>N.I. Kulagin & K.P. Bezrodny</i>	877
Influence of the primary support stiffness on the surface subsidence during tunnel construction <i>J. Likar & M. Venta</i>	883
Deformation behavior of west Mao mountain highway tunnel in gravel deposits layers during excavation <i>L.Y. Tong, S.Y. Liu, C.H. Shen & L.M. Liu</i>	889
EPB-Tunnelling control and monitoring in a urban environment: The experience of the “Nodo di Bologna” construction (Italian High Speed Railway system) <i>V. Marchionni & V. Guglielmetti</i>	895
Monitoring of structures and environment under construction and service of underground transportation projects in Russia <i>V.E. Merkin, S.N. Vlasov</i>	903
Geotechnical monitoring of the excavation exploratory galleries for the Dobrovského tunnel in Brno <i>D. Rupp, J. Pavlík & L. Klímeck</i>	907
An optimised monitoring of critical buildings adjacent to tunnel construction in urban area <i>S.H. Shin, C.Y. Kim, K.Y. Kim, K.S. Jue & S.W. Hong</i>	913
Monitoring during the construction of a shallow urban tunnel and counter measures <i>T. Solak, Z. Etkesen, A. Sirin & T. Düzgün</i>	917
Longitudinal surface settlements induced by EPB tunneling in Bangkok Clay <i>S. Suwansawat</i>	921
Tunnel excavation by controlling water pressure in the ground with unevenly distributed water bearing strata <i>H. Takahara, J. Yorita, Y. Tuzuki & H. Takahashi</i>	927

Prognosis of underground structures deterioration based on in-situ measurements <i>M. Vaniček, I. Vaniček, J. Pruška, M. Bubeníček, D. Jirásko & K. Soga</i>	933
Interaction between tunnelling and groundwater – its impact on tunnel behavior and ground settlement <i>C.S. Yoo, S.B. Kim, Y.J. Lee, S.H. Kim & H.T. Kim</i>	939
Part 4.2 Conventional tunnelling	
Integrated design and construction of Klashnice tunnels <i>P. Anagnosti & D. Lukich</i>	947
Tunneling in an urban critical area – A case study <i>J.M. Carvalho, A.T. Cavalheiro & P. Teixeira</i>	953
Construction of city service tunnel in Ostrava without preliminary protection of surface <i>K. Franczyk & K. Dolínek</i>	961
Aspects of urban tunneling within the project of Sitina tunnel <i>M. Frankovský, T. Aoki, S. Choma, V. Chomová & V. Kotrik</i>	965
New Austrian Tunneling Method: Directly under an expressway on weak silt <i>K. Fujimoto, J. Yorita, Y. Sasaki, N. Yamaki & M. Okamura</i>	971
The Prague new connection tunnels <i>M. Gramblička, D. Cyroň & M. Chyba</i>	977
Development of rock fracturing method, and application of EG-Slitter method to the tunnel <i>T. Hara, M. Okamura, T. Kimura & K. Ishiyama</i>	983
The Sir Adam Beck II intake tunnels – homage to the builders <i>D. Heath & C. Murdock</i>	987
Královopolský Tunnel in Brno, CZ <i>V. Horák, J. Pechman & J. Rožek</i>	995
Planning and design of the A3 Hindhead tunnel, Surrey, UK <i>T.J. Ireland, T.A. Rock & P. Hoyland</i>	1001
Geotechnical investigations and construction conditions for the tunnel “Strazevica” on E-75 motorway near Belgrade <i>B. Jelisavac, S. Jotic, S. Savic, V. Vujanic, M. Roljic, M. Jotic & S. Milenkovic</i>	1009
The construction of tunnel “Lipak” within the framework of E-75 motorway on Belgrade city bypass stretch <i>S. Jotic, S. Savic, M. Jotic & V. Vujanic</i>	1015
Settlement control during the construction of urban tunnels by NATM Construction of Kitayama tunnel on national highway 455 <i>T. Komatsu, H. Kitamura, K. Matsubara & T. Sakurai</i>	1021
Highways in the Czech Republic in terms of tunnel construction <i>P. Laušman</i>	1027
Urban tunneling under existing structure <i>H.S. Lee, K.S. Jue, D.Y. Kim, W.H. Jung & Y.N. Lee</i>	1031
Large double adjoined binocular tunnels in shallow and soft ground – Shoji tunnel project <i>M. Mori, M. Nakano, K. Shirakawa, M. Koike & M. Iwano</i>	1037

Stability estimation method and analysis for pillar considering the reinforcement during twin-tunnel excavation <i>S. Park, S.W. Yoon & J.S. Hwang</i>	1045
Design and construction of the longest road tunnel with eight-lane in China <i>H.F. Qu, H.H. Zhu, Y.C. Cai & X.Y. Zhuang</i>	1049
Experiences from driving dual-rail tunnels on Prague metro's IV.C2 route <i>J. Růžička, M. Kochánek & V. Valeš</i>	1055
Development of grade separation structures with small cross-sections <i>M. Shimizu, A. Watanabe, T. Genjyun, M. Kurisu, Y. Hagihara, T. Maeda & H. Watanabe</i>	1063
Civil tunnelling with electronic blasting systems – Early experience from Korea <i>Y.-S. Song & D. Kay</i>	1071
Blanka tunnel complex in Prague <i>P. Šourek, L. Šajtar, F. Polák, J. Dvořák, A. Butovič & M. Hadrava</i>	1079
Study on the behavior of an ultra-large section tunnel project in unconsolidated ground-Design and construction of the Minoh toll road tunnel <i>K. Taketomo, Y. Mitarashi, H. Shiokawa, S. Nishimura & K. Konishi</i>	1085
Large deformations in squeezing ground in the Saint-Martin La Porte gallery along the Lyon-Turin base tunnel <i>J. Triclot, M. Rettighieri & G. Barla</i>	1093
Geotechnical conditions, methods, and issues of building the transportation tunnels in the wider area of Belgrade <i>V. Vujanic, M. Jotic, S. Milenkovic, J. Josipovic & B. Jelisavac</i>	1099
Construction of major trunk road tunnels in Moscow <i>B.I. Yatskov, A.M. Zemelman, S.N. Vlasov & I.S. Bubman</i>	1105
Selecting auxiliary construction methods for NATM tunnel excavation in urban areas <i>J. Yorita, Y. Sasaki, N. Yamaki & M. Okamura</i>	1111
Part 4.3 Mechanizing tunnelling	
Construction update and TBM Excavation Seymour Capilano Twin Tunnels Project, Vancouver, Canada <i>D. Brox, D. Phelps, B. Garrod, T. Morrison & A. Saltis</i>	1119
Stress-strain soil behavior during tunneling in soft ground: Experimental study on 1g-earth pressure balanced shield model <i>D. Branque, C. Boutin & H.V. Doan</i>	1125
Conquering the construction challenges of the arrowhead tunnels <i>B. Fulcher, J. Bednarski, M. Bell & W. Burger</i>	1133
Ground loss control in EPB TBM tunnel excavation <i>M.C. Gatti & G. Cassani</i>	1141
City-Tunnel Leipzig, a challenge for the shield drive <i>W. Glitsch & T. Maidl</i>	1147
Integral studies on mechanical functions of mudding agents and the properties of muddified soils in the EPB shield tunneling technology <i>T. Hanamura, J. Kurose, Y. Aono & H. Okubo</i>	1153

North-South Urban Light Railway Cologne – A challenge for planning and construction – Technical solutions for the accomplishment of the upcoming tasks concerning the tunnels <i>D. Handke & L. Tempel</i>	1161
The latest technology in mechanized tunnelling – the design of the world's largest EPB and slurry shield TBMs <i>M. Herrenknecht & K. Bäßler</i>	1169
Compressed air work with tunnel boring machines <i>M. Herrenknecht & K. Bäßler</i>	1175
Stormwater management and road tunnel (SMART) <i>G. Klados, Y.H. Kok, D.R. Parks & D.T. Tavender</i>	1183
Wienerwaldtunnel – a challenging tunneling project <i>H. Köhler</i>	1191
The construction of shield tunnel crossing right under Shinkansen station <i>A. Kojima, T. Inoue, A. Sano, M. Shimizu & S. Suematsu</i>	1197
Non-circular full face tunnel boring machines – 21st century challenge <i>M. Krčik</i>	1205
Toulouse Metro Lot 2: soil conditioning in difficult ground conditions <i>A. Martinotto & L. Langmaack</i>	1211
Upper bound solutions for tunnel face stability considering seepage and strength increase with depth <i>J.K. Park, J.T. Blackburn & J.-H. Ahn</i>	1217
Gotthard Base Tunnel: Work progress at the five construction sections <i>M. Rehbock-Sander & A. Gerdes</i>	1223
Innovative design and construction in sydney's newest underground rail line <i>J.J. Rozek</i>	1229
Evaluation of the effects of shield tunneling on the historical Sio-Se-Pol bridge piles <i>H.S. Nejad, H.H. Hosseini & R.R. Nejad</i>	1235
Review of the project Uetliberg tunnel <i>A. Sala</i>	1241
Completion of a trans-Tokyo Bay long-distance undersea shield tunnel <i>S. Shirai, T. Takeuchi, S. Kurosaki, M. Takebayashi & T. Tomidokoro</i>	1247
Behavior of the shield studied with 3D geological structure models <i>M. Sugimoto, H. Sasao, Y. Ootsuka, T. Ogawa, K. Harada & E. Kondo</i>	1253
Lining response of twin tunnels affected by EPB shield operation <i>S. Suwansawat</i>	1261
A86-West Paris ring road-a Bi-mode TBM <i>J.L. Toris</i>	1267
RandstadRail Rotterdam – Experiences with tunnelling in difficult ground conditions <i>D.C. van Zanten, D. Handke & M.C. Braam</i>	1275
Section 5: Underground constructions executed from surface in built-up areas	
Analysis of long-term deformations of an earth-covered tunnel <i>J. Barták</i>	1283

Underpinning of live MRT piers for Singapore's new Circle Line Interchange Station <i>T.F. Lim, B.S.C. Tan, K. Kozo, W.A. Chang & C. Rintu</i>	1289
Design and construction of a cofferdam for a sub-sea tunnel on The Palm Jumeirah, Dubai <i>J.S. Gahir, A. Mochizuki, N.O. Othman & M.A. Qamzi</i>	1297
Flood protection of Prague Metro after the 2002 flood <i>M. Jakoubek</i>	1303
Underpinning using Pipe-roof <i>K. Kazutaka & S. Takaaki</i>	1309
Mathematical modelling of arch-shaped cut-and-cover structures <i>K. Kunc, J. Pruška & J. Barták</i>	1315
Numerical modelling of the interference between underground structures and aquifers in urban environment. The Turin subway – Line 1 <i>G. Ricci, R. Enrione, A. Eusebio & R. Crova</i>	1323
Application of corrugated structural plates to a cut & cover tunnel <i>Y.W. Shin, W.R. Yu, B.S. Chun & K.Y. Kim</i>	1331
Evaluation of the stability of anchored diaphragm wall basing on acceptance tests of anchors <i>A.S. Lewandowska & M.M. Czajewska</i>	1335
London Heathrow Terminal 5 – Construction and monitoring of Piccadilly Extension Junction <i>A. Stärk & J. Jäger</i>	1341
Effect of moving load to foundation excavation support configuration <i>C. Xiuwen, L. Yuanfang, Q. Ying, L. Chi, C. Guanghuang, W. Shuping, C. Zhoupin & H. Zhangjun</i>	1347
Section 6: Concrete in underground construction	
Part 6.1 Sprayed concrete	
Finite element analyze single shell lining based on contact mechanics <i>J. Zhang, W. Qiu & H. Zhang</i>	1355
The development of early-high-strength shotcrete and the evaluation of improved tunnel support system <i>H. Kanazawa, T. Nishi, T. Kiuchi, S. Nishizaki & Y. Furuto</i>	1361
Study on a strength characteristic and a quality control of the high-quality shotcrete which aimed at single-shell structure of a tunnel lining <i>T. Tosaka, T. Asakura, T. Abe, Y. Ito & M. Suenaga</i>	1369
Applications of a shotcrete robot for creating an immediate comparability of mix designs <i>M. Thewes & G. Völlmann</i>	1377
Sprayed concrete for primary tunnel lining <i>P. Polák, D. Cyroň, J. Vlašimský & V. Mika</i>	1383
Concrete and shotcrete with crushed aggregates: Experience from the AlpTransit construction site Mitholz <i>R. Weiss</i>	1389
Certification of shotcrete nozzlemen around the world <i>C. Larive & K. Gremillon</i>	1395

Robotic application of a unique sprayable membrane for the waterproofing of a subsea tunnel <i>S.L. Lamhauge, K.G. Holter & C. Ziegler</i>	1401
Part 6.2 Cast in situ and precast concrete	
Study on cracks control of tunnel lining concrete at an early age <i>H. Takayama, M. Nonomura, Y. Masuda, T. Nakayama, M. Takahashi & Y. Kojima</i>	1409
A study on fire resistant segment using short fiber resin <i>S. Seki, T. Goto, T. Morita, Y. Hayashi & T. Nakagawa</i>	1417
Basic studies on Earthquake-resistance of tunnel linings <i>H. Miyabayashi, T. Tosaka, A. Isogai, K. Yashiro & T. Aruga</i>	1423
A study on the seismic design methods for precast concrete lining (PCL) <i>D.-H. Lee, Y.-T. Choi, D.-H. Kim & B.-W. Jo</i>	1431
Design of inner lining at the Gotthard Base Tunnel, approach for the evaluation of loads, the different types of lining <i>R. Stadelmann, A. Pfeffer & Z.Q. Wei</i>	1439
Final lining of the Valík Tunnel on D5 express highway – the vault construction <i>Z. Vozárik & J. Svoboda</i>	1445
Development in pre-cast concrete segmental circular tunnel linings <i>Y.K. Vimalanathan</i>	1451
Design of replaceable structural lining segments <i>W. Qiu, J. Zhang & D. Li</i>	1457
Structural behavior of SFRC tunnel segments during TBM operations <i>R. Burgers, J. Walraven, G.A. Plizzari & G. Tiberti</i>	1461
Development of damage detection method on the tunnel lining from the laser scanning data <i>J.-S. Yoon, M. Sagong & J.S. Lee</i>	1469
The MASW method for testing tunnel lining integrity <i>R.-M. Faure, G. Lefebvre, M. Karray & G. Hémond</i>	1475
Design of the strengthening of tunnel linings under localized pressures <i>A.R. Mari & C. Molins</i>	1481
DeCo Grout – Innovative grout to cope with rock deformations in TBM tunnelling <i>B. Billig, B. Ebsen, C. Gipperich, A. Schaab & M. Wulff</i>	1487
Immersed tunnels state-of-the-art <i>L.C.F. Ingerslev</i>	1493
Immersed tunnels continue to meet the challenges of water crossings <i>W.C. Grantz, V. Tanal, L.C.F. Ingerslev, J.-N. Wang & D.P. Richards</i>	1499
Case study for the deterioration of lining in vehicular tunnel based on ventilation system <i>J.H. Choo, H.S. Ryu, Y.S. Shin & S.R. Ahn</i>	1505
Břežno tunnel shaft <i>E. Stehlik, J. Heřt & T. Parák</i>	1509
Repair and reinforcement of damaged tunnel by Acid Mine Drainage (A.M.D.) <i>Y.-S. Lee, T.-k. Yoon, Y.-S. Shin & J.-J. Han</i>	1513

Section 7: Distribution and management of risks and accidents during tunnelling

- Data management for highly mechanized shield tunnelling in the construction of the line 9 metro Barcelona 1521
C. Deulofeu, H. Schwarz, U. Maidl & M. Comulada
- Tunneling in water-bearing unconsolidated ground according to specifications for auxiliary methods revised to reflect varying soil conditions – Constructions in the north work section of the Takaoka tunnel on the Hokuriku-Shinkansen railway line 1527
F. Furukawa, Y. Hino, H. Inoue, H. Inoue, K. Asari & J. Yorita
- Use of risk management plan for urban mechanized tunnelling projects: From the establishment of the method to the successful practice 1535
P. Grasso, E. Chiriotti, S. Xu & N. Kazilis
- Risk analysis and evaluation considering geotechnical stability and environmental effect in tunnel design 1541
D.-H. Kim, C.-R. Choi, S.-J. Oh, Y.-G. Kim & J.-K. Park
- Third party safety issues in international urban tunnelling 1549
G. Lance, J. Anderson & D. Lamont
- Risk management in connection with execution of underground structures and surface development securing 1555
A.J. Lossmann & B.V. Motyčka
- Contracting issues for conventional tunnelling 1559
N. Munfah
- Development and application of the new TBM risk management system 1565
K. Murakami, M. Murayama, K. Terada, Y. Fuke, Y. Miyajima & K. Aoki
- Risk assessment of discharge due to tunnel excavation using simplified seepage analysis system (SWING) 1573
Y. Ohnishi, H. Ohtsu, K. Takahashi & T. Yasuda
- Driving of shallow tunnel in uncertain geological boundary conditions – a case history 1579
R. Pöttler, F. Thum & W. Jöbstl
- Geotechnical risk management for tunneling beneath open water 1585
D.P. Richards & B. Nilsen
- Impact of a geological incident on the construction of a land sewer outfall in Ferrol, northwest Spain 1591
J.L.S. Fernández, B.A. Álvarez & I.P. de Vera Moreno
- Sub-sea microtunnel by pipe jacking method – construction challenges 1597
S.S. Ahmed, S. Alfaour & M.Al Ghanem
- Geotechnical safety management on site 1603
W. Schubert
- NATM tunnelling at Dulles Airport 1609
E. Stehlik & M. Srb
- Risk management of the construction of tunnels using Tunnel Boring Machines (TBMs) 1613
A.H. Thomas & J.P. Banyai

Assessment of ecological safety in the process of underground development on the example of a big Russian city <i>V. Umnov & N. Vorozheykina</i>	1619
Managing risk – successful project delivery, underground infrastructure for Terminal 5 Heathrow Airport, UK <i>O.I. Williams</i>	1623
Development and application of process-oriented shield tunneling risk management system <i>T. Xuan, W. Huiming & B. Chow</i>	1629
Evaluation of tunnel behavior and decision making of counter measures in weak zones <i>H. Yagi, M. Hashimoto, Y. Yoshida, K. Tamamura & A. Uneda</i>	1633
The measures for preventing acid rock drainage through the results of acid rock drainage assessment and contamination transport numerical analysis <i>Y.-H. Yoo, J.-B. Oh, D.-H. Lee, J.-G. Kim & H.-P. Chun</i>	1641
State of the art tunnelling technologies <i>Ž. Žderić, G. Pervan & Đ. Radić</i>	1647
Author Index	1653
 Volume 3	
Section 8: Tunnel equipment: fire and operational safety	
Part 8.1 Safety equipment	
Safety analysis of the Branisko tunnel ventilation <i>M. Bettelini, M. Bakoš & N. Seifert</i>	1663
Safety doors in the world's longest tunnel under the Gotthard: Outstanding requirements and performance. Feed-back from the bidding phase and results from the testing phase on selected prototypes <i>D. Fabbri, C. Strassl & S. Peggs</i>	1671
Mechanical equipment in long, high-speed rail tunnels – Specification and operational experience of doors, cabinets, containers and other elements in the Loetschberg Base Line <i>R. Haldimann, S. Nyfeler & P. Reinke</i>	1677
Study on the behavior of smoke from a train fire based on the track gradients in railroad tunnels equipped with a forced ventilation system <i>D.-H. Kim, Y.-J. Jang & J.-J. Moon</i>	1687
An experimental study on the tunnel pressurization for smoke control <i>H.S.A. Lee, I.S.B. Oh, K.C.C. Lee, W.K. Kim & W.J. Kim</i>	1693
Effectiveness of critical velocity method for evacuation environment in a railroad tunnel at fire situation <i>S.-C. Lee, S.-H. Lee & J.-H. Lee</i>	1699
Numerical simulation in effect of compartmentalization with Water Screen (WS) in a tunnel fire <i>M. Murakami, H. Kurioka, O. Imazeki, H. Kuwana & R. Amano</i>	1705
Road tunnel equipment <i>M. Novák, V. Misárek & D. Benda</i>	1711

- Site ventilation of a long deep tunnel: The lot Bodio of the Gotthard base tunnel 1717
M. Oberaigner & F. Romerio
- Ventilation of cross-passages in long rail tunnels: Requirements and possible solutions with a passive or an active ventilation system for the Gotthard base tunnel 1721
D. Portmann, P. Reinke, B. Hagenah & A. Busslinger
- Fire test in the Mrázovka tunnel and its impact on the ventilation control systems in tunnels Mrázovka and Blanka 1727
J. Pořízek, M. Hanfová & L. Šajtar
- Optimization of tunnel system based on ITS architecture 1733
P. Příbyl
- Increasing industrial safety and climatic conditions by the use of spray nozzles 1739
A. Rudolf, O. Gloth & P. Schürmann
- Towards tunnel facility management: Applying asset management to the operation and maintenance of tunnels within infrastructure networks 1745
J. Ruiter
- International tunnel control system – introduction and experiences from realization 1749
J. Řehák
- System of traffic control on Prague inner city ring 1755
J. Štefan
- Facility management methods for an improved serviceability of traffic tunnels and their application to tunnel drainage problems 1759
M. Thewes, F. Heimbecher & G. Vollmann
- Part 8.2 Fire protection measurement**
- Fire protection concept for the Ceneri base tunnel 1767
S. Čufer
- Newest issues of integrated road urban tunnel fire protection system 1773
N.F. Davydkin & S.N. Vlasov
- Creation of advanced technologies in the generation of electrically safe flows of finely dispersed water for fire protection of underground installations 1779
A.S. Chirko, A.V. Karpyshev & M.D. Segal
- Modeling of blasts and fires accidents in tunnels 1783
A.S. Chirko, P. Efremov, V.E. Fortov, V.V. Golub & A.V. Zibarov
- Fire test to characterize fire-induced damage of concrete lining in NATM tunnel 1787
S.-W. Choi, S.-H. Chang, G.-J. Bae, J.-W. Kwon
- Large scale fire tests with different railway overhead systems – experience by the test center 1793
S. J. Seirer, V. Wetzig
- The research on countermeasure of fireproofing and rescue for long highway tunnel 1799
Y.-D. Wang, Y.-X. Xia & N.-B. Deng
- Experimental study on mechanical behaviors of tunnel lining under and after fire scenarios 1805
Z.G. Yan & H.H. Zhu

Part 8.3 Risk analysis	
Risk analysis of the Branisko tunnel <i>M. Bakoš, N. Seifert & M. Bettelini</i>	1813
ITA-Committee on operational safety of underground facilities – COSUF: Role and Objectives <i>A. Haack</i>	1819
Optimisation of road tunnel safety based on risk analysis <i>M. Holický, J. Smolik & L. Šajtar</i>	1827
Austrian Risk Analysis for road tunnels development of a new method for the Risk Assessment of road tunnels <i>B. Kohl, K. Botschek & R. Hörhan</i>	1835
Safety requirements of the 53 kilometer railway tunnel through the Alps between Italy and France <i>J.E. Nieuwenhuis, F.Q. Ambrunaz, E. Verbesselt, E. Boisguerin, P. Piepers & A. van der Giessen</i>	1841
Operational safety of road tunnels: Safety reviews of tunnel projects and existing tunnels <i>N. Seifert & R. Siegenthaler</i>	1849
Experiences and (in)effective application of QRA for assessing tunnel safety in the Netherlands <i>C.J. Soons, J.W. Bosch, P.H.A.J.M. van Gelder & J.K. Vrijling</i>	1853
Emergency egress provisions and their guidelines <i>M. Vasilovska & M. Reedman</i>	1861
Section 9: Historical underground constructions; maintenance and reconstruction of underground constructions	
Geotechnical recent issues in relation to past mining activities at urban area of historical mining towns in Slovakia <i>V. Bauer, E. Sombathy & M. Stavníkovič</i>	1871
Results of the excavation works in upgrading the Frejus railway tunnel <i>P. Grasso, M. Pescara, F. Valdemarin & G. Beccaria</i>	1879
Monitoring and evaluation after repair and reinforcement of damaged 3-lane Freeway Tunnel located within fault Influenced zone <i>J.-S. Hou, D.-J. Tseng & Y.-H. Lee</i>	1885
Environmentally friendly subway construction in the overcrowded city of Tokyo <i>K. Irie & S. Nishibayashi</i>	1891
Reliability assessment, repair, and replacement of historic water tunnels and their contribution to California's sustainability <i>J. Kaneshiro, F. Kintzer, M.L. Piek, R. Yoshimura, D. Van Horsen, G. Korbin, K. Lovelie, J. Carfrae, R. McManus & C. Ovalle</i>	1897
Study on maintenance planning for tunnels by risk management system <i>S. Konishi, K. Kuribayashi, K. Sudou, K. Kamemura, M. Hori & C. Hatakenaka</i>	1907
Reconstruction of the Jablunkov tunnels <i>J. Korejčík & J. Růžička</i>	1913

Upgrading old masonry interceptor sewers to modern sewerage standards <i>C. Madryas, A. Szot & L. Wysocki</i>	1919
The old railway tunnel of Mainz – A design and construction concept for the expansion of two approx. 150 year old tunnels in urban areas <i>Th. Marcher, G. Braun & F. Jiricny</i>	1925
Analytical investigation of damaged tunnel linings by the action of excessive earth pressure <i>H. Mashimo</i>	1931
Historical damages of tunnels in Japan and case studies of damaged railway tunnels in the Mid Niigata Prefecture Earthquakes <i>M. Shimizu, T. Suzuki, S. Kato, Y. Kojima, K. Yashiro & T. Asakura</i>	1937
Close underpass of ancient tunnels: Methodology and results <i>A. Sorlini, G. Amoretti & F. Zannoni</i>	1945
Advanced methods for tunnel assessment <i>G.R. Sulibhavi & W.A. Parks</i>	1949
“Lokve” tunnel rehabilitation – experiences and applied solutions <i>Z. Tomanović</i>	1955
The ring method application to the Prague Metro construction <i>P. Vozárik</i>	1959
Value Preservation of underground infrastructure through focused conceptual planning <i>N. Winkler & A.W. Ackermann</i>	1963
Diagnosis and repair of a subway tunnel 75 years old <i>T. Yamamoto & S. Matsukawa</i>	1969
Author index	1975
